### Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

#### **Drawings**

1. Figures 1A and 1B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### Claim Objections

2. Claims 1-3, 6, 8, 13, 18, 20, and 24 are objected to because of the following informalities:

With respect to claim 1, in lines 13 and 16, "the result" lacks antecedent basis.

With respect to claim 2, in line 3, "the result" lacks antecedent basis.

With respect to claim 3, in line 7, "the bit compensating unit" lacks antecedent basis.

With respect to claims 6 and 18, in line 3, it is unclear whether  $\theta$  represents a zero or an indefinite value.

With respect to claim 8, in line 22, "the coefficient calculation unit" and in line 24, "the result" lack antecedent basis.

Application/Control Number: 09/972,959

Art Unit: 2667

With respect to claim 13, in line 6, "the result", in lines 8-9 "the butterfly operated signal", in lines 15-16, "the cumulative scale count value", and in line 19 "the butterfly operated value" lack antecedent basis.

With respect to claim 20, in line 22, "the result" lacks antecedent basis.

With respect to claim 24, in line 2, "each of the 4 result values ... is added" lacks antecedent basis because independent claim 20 does not recite 4 result values.

Appropriate correction is required.

## Allowable Subject Matter

3. Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a scale detection unit for calculating ant outputting a scale factor which is a division factor used for controlling a bit value of a butterfly operated signal input from the butterfly operation unit to the input buffer unit at each stage within a predetermined bit limit of the received OFDM signal; a scale count unit for cumulative counting a count coefficient corresponding to the scale factor input from the scale detection unit, and then outputting a result; and a compensation unit for controlling the bit of a signal input from the butterfly operation unit according to values obtained from the scale detection unit and the scale count unit, and then outputting a result, as specified in independent claims 1 and 13.

Prosecution on the merits is closed in accordance with the practice under *Ex parte*Ouayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Application/Control Number: 09/972,959

Art Unit: 2667

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kozaki et al (US Patent No. 6,240,062 B1) discloses fast fourier transform calculating apparatus and method.

Nawa et al (US Patent No. 6,735,167 B1) discloses orthogonal transform processor.

Kozaki et al (US Patent No. 6,058,409) discloses FFT apparatus.

Keevill et al (US Pub 2003/0142764 A1) discloses single chip VLSI implementation of a digital receiver employing OFDM.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H. Ly whose telephone number is 571-272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
